updates

From the Chairman's Desk

Dear Friends,

'Updates' is an updated version of our bulletin, 'Highlights'. This is in keeping pace with the changing times.

It gives us immense pleasure to announce our technical collaboration with Ariosteia, Italy. This collaboration will give us access to Ariosteia's world class technology in handling, conveying and storing, PVC Powder for Plastic Industries. Prasad offered material handling systems for granules till date and now it will offer solutions for powder material also.

This issue carries an interview with one of our prominent clients, Molex. We are thankful to Mr. Baburaoji for giving his valued feedback on our products and services.

Prasad Group wishes a very happy Diwali and a prosperous New Year to the readers and looks forward to a wonderful year ahead.

Prakash Shah

Technical Collaboration with

About

ARIOSTEA

Ariosteal has been at the forefront of building world class plants for conveying, dosing and storing powder and pellet materials for more than five decades.

Since 1952, its main focus has been building bulk solid handling systems and supplying equipments to the plastic, chemical, petrochemical and wood composite industries.

Ariosteal's strength is to handle various kinds of powders and additives especially in PVC processing with installed base of more than 1500 projects world-wide.

It has built plants from Uzbekistan to China, from Argentina to the Ivory Coast, apart from major plants in Europe and U.S.A.

Ariosteal's Prime Service is a fully dedicated service to its customers offering preventive maintenance, advance training for plant management, technical seminars on-site or at our facility.

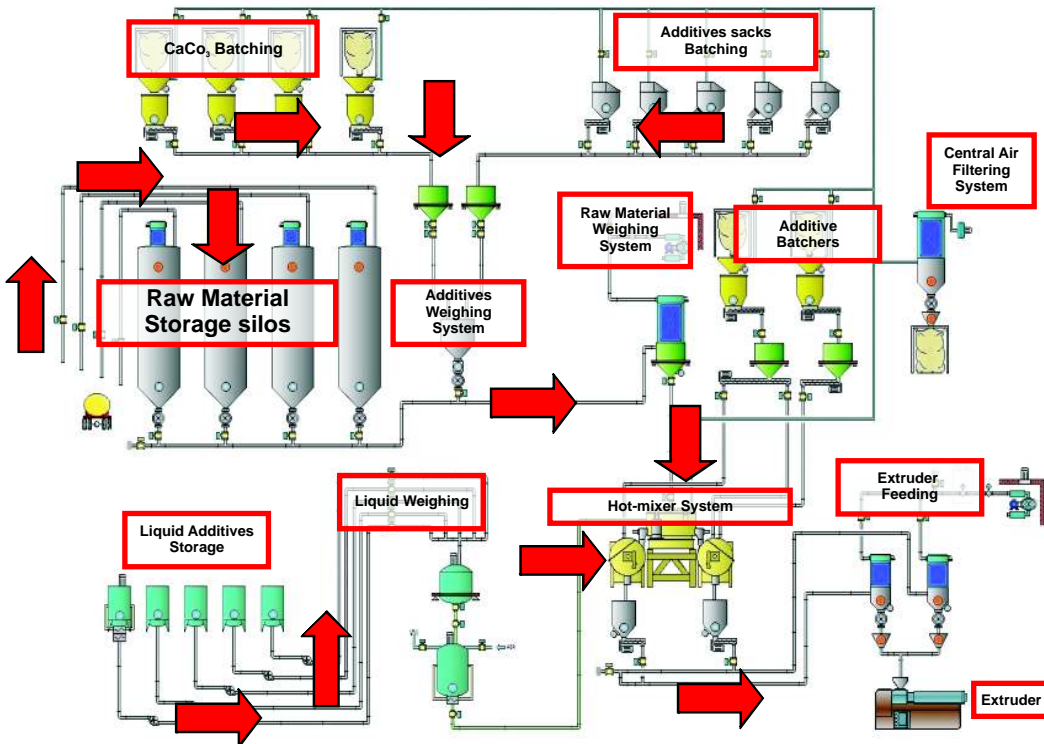

The company offers turn-key Material Handling Systems for:

- PVC Pipe/Profile Plant
- Wood Composite Plant
- Rotomoulding Plant
- PVC Film and Sheet Plant

Ariosteal's range covers throughput upto 30 tons/hr for powder and 50 tons/hr for granules. It manufactures silos in steel & stainless steel and steel with plastic coating from 50 tons to 300 tons and is supplied with fully automatic feeding system.

Total Material Handling Project for PVC Pipe and Sheet Plant

Centralised Conveying System

The Group has successfully installed more than 100 material handling systems in India. It offers technology from Koch-Technik, Germany with patented dust separating system, total material management and integration with ERP.

The advantages of the system are...

- Fully automatic material transfer
- Flexibility in handling various materials
- Central raw material storage
- Increase in productivity
- Labour saving
- Reduced spillage / wastage
- Neat and clean work area
- SCADA integration

Client Testimonial

“Our relationship with Prasad goes back 15 years, when Mafatlal started this company. We were looking for the right partner who could offer us world-class technology.

The people at Prasad had the patience to completely understand and comprehend our requirements and give a cost-effective solution and the best technology.

By associating with Prasad Koch-Technik we have created work atmosphere and used technology that meet stringent requirements of international automobile customers across the world.

The collaboration between Prasad and Molex has brought what you see on the shop floor today. We are extremely proud to associate with the Prasad Group.

- Prasad Koch-Technik has installed Central Conveying & Drying System at Molex Mafatlal Micron Pvt. Ltd., Gandhinagar.

Happenings @ PRASAD

Navaratri Extravaganza

The Group organized a Navaratri festival and a Garba competition on 4th October, 2008. The spirit of Navaratri was upheld by the people at Prasad in style, who enjoyed the gala evening with fun and excitement.

Pindawal Visit

As a part of its CSR initiative the Prasad Group employees visited Pindawal, a tribal village in Dharampur, near Valsad to witness and participate in its development. The Group has helped uplift the lives of the people in the village through generous support. It gave a sense of participation and contentment to the people at Prasad after the visit.
