Plexpo India 2013,

8 to 13 January 2013, Gandhinagar, Gujarat
(Our Stall: S-15)

From the Chairman's Desk

Dear Friends,
Greetings!

We at Prasad Group sincerely hope that the first half of the financial year has continual effect of PLASTINDIA 2012 and brought each of you lots of hope and opportunities.

It's clear that Plastics consumption is increasing faster than its expectation due to its multi usages. Food consumption is increasing along with population and agriculture lands are shrinking. With this scenario Drip irrigation, Mulch films, Canal lining & Fertilizer packing is going to increase by manifold.

With urbanization and nuclear families, ready to eat & ready to cook food become norm. Packaged food with high quality packaging film can only be produced with sophisticated machine along with modern Automation System.

The Plastindia 2012 was a great opportunity to showcase our strengths and potential. We are happy that more than 40 not only Indian but European and Asian OEMs have also displayed their machines with PRASAD equipment – Quality is appreciated across the board.

We thank you all for your support and patronage at Plastindia 2012 and looking forward to see newer avenues of plastics and high technical polymers in our Life.

Regards,

Prakash Shah
Chairman

Plastindia 2012

A glimpse of Plastindia 2012

The atmosphere at Plastindia 2012 was lively as Prasad Group showcased various applications in Plastic Processing Machines. The leading highlights of new technology and automation equipments on display were constantly drawing the visitors to the Prasad stall.

The Group's success at the exhibition is a true testimony to its commitment of offering innovative, cost-effective and user friendly products.

Air Chiller for OBC & IBC with Five Layer Blown Film Plant

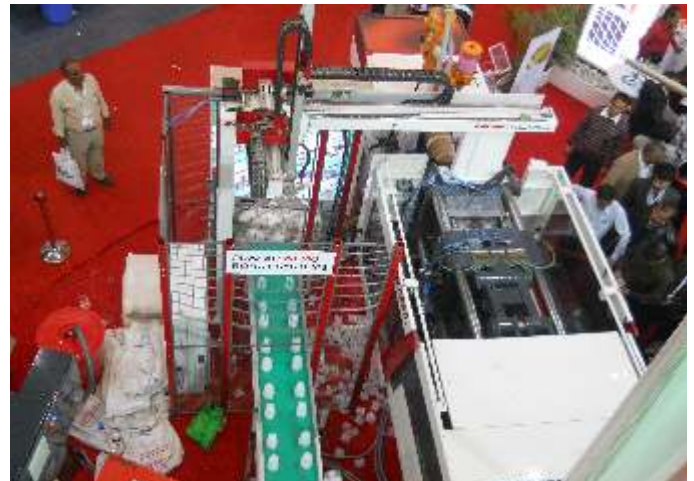

Multi Component Gravimetric Dosing Mixing System on Multi Layer Lamination Plant

Extrusion Process Monitoring System on Three Layer Blown Film Plant for continuous display of output in each layer.

Conveyor Belt and Online Counting System for PET Preform

High Speed Servo Robot System on Injection Moulding Machine with Conveyor Belt and Safety Cage

Proud Association - ALPLA India Pvt. Ltd.

ALPLA is a world leader in packaging solutions sector since 1955.

With its head plant in Austria, the company is a pioneering packaging company that uses the latest production technologies to provide the highest quality packaging to their consumers. The company works around the clock in the form of providing variety packaging for the most diverse contents from shower gels to engine oils, detergent to lemonade etc. Technical creativity and intelligence are the core values that have led to the ALPLA success story.

Central material conveying with online masterbatch dosing mixing

Product conveying and counting

Dosing mixing conveying

Dear Friends,

“Our association with Prasad Group goes back to our first supply of equipments from them almost five years ago in 2007. Today, our alliance has become so strong that we acquire almost all our equipments of various kinds like Conveyor belts, Dosing Mixing System, Central Conveying System and Granulators for our plants located in India at Sitarganj, Baddi and Medak from the Prasad Group.

We appreciate the high quality, commitment and customer friendly approach of the Prasad Group and thus, they are always our first preference to partner with. They always have the right equipments and apt selection for us to choose from. Our association with Prasad Group is only getting stronger and deeper over the years.”

Thanking you,

Mr. Vagish Dixit

Managing Director
ALPLA India Pvt. Ltd.
